SUMMARY

Full-Stack and Mobile Developer with 4+ years of experience building, shipping, and maintaining production web and mobile applications using React, React Native, Expo, Node.js, Express, Firebase, and Google Cloud Platform. Experienced in mobile app development, REST API development, Firebase authentication, serverless architecture, production support, performance optimization, cloud cost reduction, bug fixing, and feature delivery. Built applications used by real customers and supported systems handling more than 10,000 daily requests.

SKILLS

- Languages: JavaScript, TypeScript, Python, SQL
- Frontend: React, React Native, Expo, HTML, CSS
- Backend: Node.js, Express, REST APIs, Firebase, Flask
- Cloud and DevOps: Google Cloud Platform, Firebase, Docker, Git, GitHub
- Tools: VS Code, Swagger, Webpack

EXPERIENCE

Gallimore Software

Full-Stack Developer | Remote | Oct 2022 - Apr 2024

- Led development and production deployment of Hormesis Elite, a React Native mobile application serving paying users.
- Migrated backend architecture from .NET Core and SQL Server to Node.js, Firebase, and Google Cloud Platform, improving API response times by about 40 percent and reducing cloud costs by more than 50 percent.
- Built secure authentication, real-time data features, and scalable serverless APIs using Firebase Authentication, Firestore, and cloud-based backend services.
- Fixed production bugs, shipped new product features, and supported a live mobile app with minimal downtime.

Upwork

Freelance Software Programmer | Remote | Jun 2021 - Oct 2022

- Delivered full-stack and backend solutions for international clients using JavaScript, Python, Flask, and REST APIs.
- Built secure and scalable APIs handling more than 10,000 daily requests.
- Managed software features from development to deployment in agile client environments.

PROJECTS

Tillton POS

Retail point-of-sale and inventory app for managing sales, stock, staff, and store activity from one mobile workflow.

- Built with React Native, Expo, Firebase Authentication, Firebase Realtime Database, and local device persistence.
- App Store: <https://apps.apple.com/us/app/tillton-pos/id6765776148>
- Google Play: <https://play.google.com/store/apps/details?id=com.flemton.tillton>

STG Triage

Clinical decision-support mobile app for clinicians, doctors, and health workers in Ghana using the Ghana Standard Treatment Guidelines.

- Built as an offline-first React Native and Expo app for fast symptom-based triage and treatment guidance.
- App Store: <https://apps.apple.com/us/app/stg-triage/id6760623593>
- Google Play: <https://play.google.com/store/apps/details?id=com.flemton.stgtriage>

NMC CBT Practice Pro

Empowers nurses to ace the UK NMC Computer-Based Test (Adult Nursing) with realistic mock exams, adaptive quizzes, detailed analytics, and offline study tools.

- Built with React Native and Firebase with realistic mocks, progress tracking, analytics, and offline study support.
- App Store: <https://apps.apple.com/us/app/nmc-cbt-practice-pro/id6756345733>
- Google Play: https://play.google.com/store/apps/details?id=com.flemton.cbt_practice_pro

Hormesis Elite

Production mobile application for competitive paintball rankings and user engagement.

- Built with React Native, Expo, Firebase, and Google Cloud Platform.
- App Store: <https://apps.apple.com/gh/app/hormesis-elite/id6449320338>
- Google Play: https://play.google.com/store/apps/details?id=com.gallimore.hormesis_elite

EDUCATION

University of Cape Coast

Bachelor of Science in Computer Science | Cape Coast, Ghana | Sep 2019 - Jun 2023

Microverse

Full-Stack Software Development Program | Remote | Nov 2022 - Dec 2023

CERTIFICATIONS

- Microverse Software Development Program
- HarvardX: CS50's Introduction to Computer Science
- Coursera: Introduction to Mobile Development
