PROFESSIONAL SUMMARY

Full-Stack and Mobile Developer with 4+ years of experience building, shipping, and maintaining production web and mobile applications using React, React Native, Expo, Node.js, Express, Firebase, and Google Cloud Platform. Experienced in frontend development, backend development, mobile app development, REST API development, Firebase authentication, serverless architecture, production support, performance optimization, cloud cost reduction, bug fixing, and feature delivery. Built applications used by real customers and supported systems handling more than 10,000 daily requests.

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, SQL
- Frontend: React, React Native, Expo, HTML, CSS
- Backend: Node.js, Express, REST APIs, Firebase, Flask
- Cloud and DevOps: Google Cloud Platform, Firebase, Docker, Git, GitHub
- Tools: VS Code, Swagger, Webpack

PROFESSIONAL EXPERIENCE

Gallimore Software

Full-Stack Developer | Remote | Oct 2022 - Apr 2024

- Led development and production deployment of Hormesis Elite, a React Native mobile application serving paying users.
- Migrated backend architecture from .NET Core and SQL Server to Node.js, Firebase, and Google Cloud Platform, improving API response times by about 40 percent and reducing cloud costs by more than 50 percent.
- Built secure authentication, real-time data features, and scalable serverless APIs using Firebase Authentication, Firestore, and cloud-based backend services.
- Fixed production bugs, shipped new product features, and supported a live mobile app with minimal downtime.
- Containerized services with Docker to improve development consistency and deployment reliability.

Upwork

Freelance Software Programmer | Remote | Jun 2021 - Oct 2022

- Delivered full-stack and backend solutions for international clients using JavaScript, Python, Flask, and REST APIs.
- Built secure and scalable APIs handling more than 10,000 daily requests.
- Managed software features from development to deployment in agile client environments.
- Maintained strong client satisfaction through reliable delivery, communication, and problem solving.

Microverse

Mentor (Volunteer) | Remote | Jan 2023 - Mar 2023

- Mentored junior developers on JavaScript, React, backend fundamentals, and production-ready coding practices.
- Reviewed code, improved application structure, and guided peers on debugging and software quality.

SELECTED PROJECTS

STG Triage

Clinical decision support mobile application for clinicians, doctors, and health workers in Ghana using the Ghana Standard Treatment Guidelines.

- Built as an offline-first React Native and Expo application that accepts signs, symptoms, and duration and surfaces likely conditions and treatment guidance.
- Designed for fast, lightweight use in clinical settings by health workers who diagnose and prescribe with the Ghana Standard Treatment Guidelines.
- Improved the symptom-matching logic, added automated tests, and shipped branded launcher and splash assets.
- App Store: <https://apps.apple.com/us/app/stg-triage/id6760623593>

NMC CBT Practice Pro

Mobile exam preparation application for UK nurses preparing for the NMC Computer-Based Test.

- Built with React Native and Firebase with analytics, progress tracking, and offline study support.
- Focused on realistic practice workflows, study accessibility, and mobile-first user experience.
- App Store: <https://apps.apple.com/us/app/nmc-cbt-practice-pro/id6756345733>

Hormesis Elite

Production mobile application for competitive paintball rankings and user engagement.

- Built with React Native, Expo, Firebase, and Google Cloud Platform.
- Delivered as a live mobile product with real users and production support requirements.
- App Store: <https://apps.apple.com/gh/app/hormesis-elite/id6449320338>

EDUCATION

University of Cape Coast

Bachelor of Science in Computer Science | Cape Coast, Ghana | Sep 2019 - Jun 2023

Microverse

Full-Stack Software Development Program | Remote | Nov 2022 - Dec 2023

CERTIFICATIONS

- Microverse Software Development Program
- HarvardX: CS50's Introduction to Computer Science
- Coursera: Introduction to Mobile Development
